

Mask Sampling

Based on the answers to your Mask Fit Questionnaire, our Sleep Technicians will help you select a mask that will be both comfortable and effective. You will be able to try the mask on in order to determine how it will feel during treatment. If CPAP treatment is necessary, we will provide all of the details of the mask and the fitting to your provider or Durable Medical Equipment company to ensure you get the same mask when you order your equipment. As shown below, masks vary in size, style, fit, and even color.
